**JOS and 13 industry-leading vendors will be presenting on
how businesses can maximize the business power of IT
at JOS Technology Symposium 2008**

8 May 2008, Singapore — The much awaited annual conference cum technology showcase, JOS Technology Symposium, is back again this year with more quality and insightful presentations and bigger technology showcase. Organised by Jardine OneSolution (200) Pte Ltd (“JOS”), JOS Technology Symposium will bring together 13 industry-leading vendors to share their insights on how to “Maximize the Business Power of IT” – the theme of this year.

With an ever-increasing business demand to integrate technology and business, technology decisions are increasingly driven by business needs in enterprises. In the past, IT planning and decisions solely focus on the IT resource constraints and there is little alignment of IT with the business. The need to achieve better and faster IT response to business needs in today's competitive business environment has governed all the IT decisions to reap tangible business benefits such as improved operational efficiency and increased ROI.

Recognizing a business approach to IT decisions is needed to further perpetuate business growth and advantage over the competition, JOS and 13 industry-leading vendors, including 3Com, Acronis, Avocent, Cisco, Comstor, Egenera, HP, IBM, Juniper Networks, Oracle, Symantec, sendQuick and VMware will be sharing exclusive presentations and case studies on

how to maximize the business power of the hottest IT solutions – Green IT, Unified Communications, Virtualization and Security. In addition, delegates can expect to gain hands-on experience with the innovative technologies and solutions that will be showcased at the mega solution pavilion and be enthralled by the live demonstration at the exhibition booths.

We are expecting more than 400 delegates from multi-vertical segments comprising C-level executives, IT/Systems/Network/Security Directors/Managers/Assistant Managers, Systems Analysts and IT Administrators.

Event Details:

JOS Technology Symposium 2008

4th June 2008, 9:00am – 6:00pm

Suntec Convention Centre, Auditorium, 3rd Level
