HKBN Enterprise Solutions Launches "Business Continuity Service Anywhere" Reduce Business Downtime with Fast Deployment at Multiple Locations in HK

(Hong Kong – 22 January 2020) HKBN Enterprise Solutions ("HKBNES") announces the launch of **Business Continuity Service (BCS) Anywhere** in Hong Kong to help businesses continue their operations in times of disruption that may hinder access to offices.

BCS Anywhere provides an essential security blanket for enterprises to minimise loss and keep their businesses up and running in times of contingencies. Tailored to each enterprise customer's needs, including compliance with regulatory requirements, this service works by completing core mission-critical data set-up (such as financial, HR, IT systems and customer information) for remote access by employees at different locations across Hong Kong, minimising the impact of business disruption.

Secure backup sites with dedicated connectivity at 4 locations
"BCS Anywhere provides **unprecedented flexibility** on location choices covering Hong Kong Island, Kowloon and New Territories. We can quickly retrieve business-critical data and set up each customer's systems **at any of the 4 strategic locations** in Chai Wan, Kowloon Bay, Kwai Chung and Tsuen Wan, with more locations coming in the future such as Island South," said Doris Chan, Co-Owner and Chief Operations Officer – HKBNES.

"Our BCS Anywhere uniquely enables economies of scale with a relatively **low cost of investment and fast deployment at multiple locations** without the need to purchase or maintain any equipment. We offer three tiers of seats such as dedicated positions, guaranteed positions and shared positions available to accommodate different budgets and needs," added Doris.

End-to-end ICT solutions capabilities
"We're proud to pioneer unprecedentedly flexible BCS to fully support our customers' service continuity on contingencies," said Billy Yeung, Co-Owner and Chief Executive Officer – HKBNES & JOS Group." Customers can also benefit from our **superb end-to-end capabilities** such as unique tri-carrier network diversity to address requirements for backup, data protection, disaster recovery, high availability and managed security."

For more details of BCS Anywhere, please contact HKBNES hotline at 128 1111.
