

# Innovation Foundry

Designing for Future, Together

## Virtual Reality • VR

- Enhances e-learning experience
- Improves training efficiency
- Designs a new dimension of customer journey

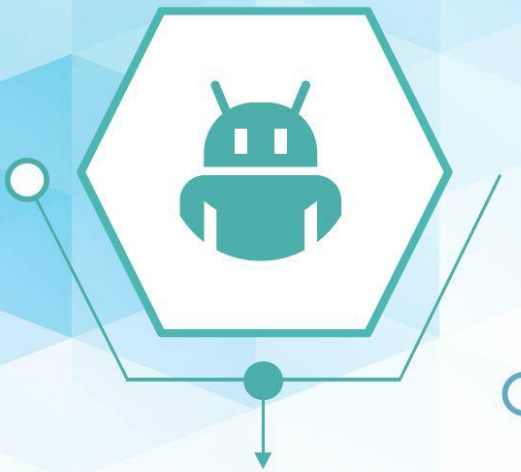

## Chatbot • NLP

- Improves customer experience through 'humanised' interactions
- Improves up-selling and cross-selling opportunities
- Delivers solution rapidly by understanding human language

## Artificial Intelligence • AI

- Provides comprehensive solutions to complex issues
- Complements human decision-making
- Empowers human workers to pursue higher value tasks

## Robotic Process Automation • RPA

- Maximizes output through 24/7 operations
- Achieves operational efficiency
- Minimizes human error

## Workflow Automation

- Streamlines working processes
- Integrates between legacy and new systems
- Enables real-time collaboration

## Agile Implementation

- Delivers MVP with minimal resources
- Mitigates project risk
- Builds closer partnership with clients
