Asia’s Top Cybersecurity Risks

Episode 2

Malware
Did you know?

**US$ 2.4 million**
Average cost of a malware attack on a company

**72 million**
Number of business detections of malware in 2018, up 79% from 2017

Sources:
1. Accenture’s Cost of Cyber Crime Study 2017
2. Malwarebytes’ State of Malware report 2019
ATTACK

Attackers send harmful software that spreads across the enterprise to destroy data, steal confidential information or disable systems and networks.

DANGER

- Impaired systems cause serious business destruction
- Compromised systems allow attackers to steal or destroy data
- Dispersed infection leads to extensive recovery time and effort

WHO SHOULD BE WORRIED

IT administrators, business executives, and company operations.
JOS helps safeguard your business with

**Consulting**
Apply security best practices to identify the cause of malware outbreak

**Product Recommendations**
Understand the network and IT environment to recommend appropriate products, including Endpoint Detection and Response and Network Behaviour Analysis
