

# JOS Cloud+

*Take your business to greater heights when you accelerate your cloud journey with us*

## The Future Lies in the Cloud

Today's age of disruption led by technology is transforming the way we do business. Artificial intelligence is automating tedious manual processes. Mobile productivity tools are empowering today's breed of digital workers. Always-on apps are transforming end-user expectations.

How do you stay agile, competitive, and profitable in this changing landscape? Your business needs to undertake a digital transformation—one that boosts productivity, fosters innovation, and deepens customer engagement—that starts with the cloud. Today, cloud adoption is no longer just a cost-saving IT exercise but a strategic initiative to modernise your business.

### **Empower employees**

The cloud enhances collaboration among employees while empowering them to work on the go, giving them the flexibility to work on their own terms.

### **Foster innovation**

The cloud is built with emerging technologies—such as intelligent databases, microservices and machine learning—in mind.

### **Deepen customer engagement**

The agility of the cloud significantly reduces time-to-market, giving you the speed to incorporate customers' feedback in new products that will resonate deeply with them.

# The cloud starts with JOS Cloud+

JOS's forward-thinking mindset is the cornerstone of our cloud solutions. It empowers us to see today as a steppingstone for tomorrow and business challenges as growth opportunities for you to seize.

As Asia Pacific's leading technology partner and systems integrator, we leverage the cloud to solve your biggest problems. We combine the breadth of our experience, from managing on-premises to public clouds, with the depth of our experience, whether it is in Cloud API or Kubernetes, to connect your business to the cloud and lay the groundwork for digital transformation.

We don't settle for a one-size-fits-all approach. We believe in collaborating closely with our customers to better understand their exacting requirements and implement cloud solutions that deliver greater business impact. Whether it is to deploy on-premises or build private clouds, our customers trust us to help them embark on their cloud journey towards success.

# JOS Cloud+ provides you with...

A strong regional coverage in Asia Pacific

An end-to-end cloud portfolio to ensure we have what you need

Certified cloud experts to make your cloud journey a success

We have over **60 years of experience** across Asia Pacific's major business hubs, where we help organisations make their move towards the cloud.

From SaaS to DCaaS, we **deliver a full suite of cloud solutions** from the world's largest cloud providers, tailored to your exact needs.

Our cloud professionals are **certified on all key public clouds** to ensure you have the best consultancy and service throughout your cloud journey.

JOS Cloud+ is a comprehensive cloud portfolio that offers solutions from infrastructure to stack, tailored consultancy and services, and the regional expertise you need at every step of your cloud transformation journey.
