Malaysia Special

**RiskManagement
in Technology
(RMiT)**

What is RMiT

Risk Management in Technology (RMiT) is a set of policies and guidance issued by Bank Negara Malaysia for local financial institutions to manage technology risk

The policy document comes into effect on

**1 January
2020**

Do you know, to comply with RMIT, financial institutions must

Designate a CISO responsible for technology risk management function

Record and maintain user activity logs in critical system for at least three years to support audit and review in a timely manner

AND MUCH MORE

How can JOS help?

jos

Vulnerability

Risk Assessment (VRA)

Work with CISOs to review IT governance and compliance posture to offer best practice for risk management and design cyber resiliency measures

RMiT Compliance Solution

Recommend and implement appropriate solutions, like Multi-Factor Authentication (MFA), Privilege Access Management (PAM) and Patch Management, to comply with security and compliance policies

Awareness Training

Conduct regular drills and workshops to raise awareness across the entire organization, from board members to contract staff
