

Green Data Centre Services

Today, the data centre is the heart of any successful enterprise. Meanwhile, inefficiencies or unplanned interruptions in this complex asset can cost money, blunt competitive edge and damage their reputation. HKBN JOS Data Centre Services are designed to keep your facility running as efficiently, reliably and cost-effectively as possible. They include:

Managed Hosting

Enjoy peace of mind by locating your servers and computing hardware in our stable, resilient and highly secure environment. HKBN JOS offers the flexibility, scalability and 24x7 monitoring you need to release in-house IT resources from routine facilities management tasks.

Smart Hand Service

Giving you what you need when you need it, HKBN JOS Smart Hand Service provides basic on-site operational support as well as an immediate response to emergencies. The result is improved equipment uptime and lower infrastructure management costs.

DR/BCP Service

Less than 10% of companies without a recovery plan in place survive a major disaster. HKBN JOS' DR/BCP service can help you beat the odds when disaster strikes, improve your ability to smoothly resume the services and comply with legal or statutory obligations.
