

Mobile Device Management (MDM)

According to Strategy Analytics, a staggering 1.88 billion people – or very nearly half (43.3%) of the world's workforce – will be mobile by 2023. While that offers incredible opportunities, it also represents a major challenge for business.

The HKBN JOS Mobile Device Management (MDM) portfolio is designed to meet the needs of companies interested in embracing mobility and getting a handle on the mobile devices that are officially and unofficially infiltrating their IT infrastructure. Whether you need enterprise mobility management software, mobile devices, or services to help install, configure and run your solution, HKBN JOS can help.

Software

Manage software like Airwatch, Mobile Iron, Blackberry, Good for Enterprise

Mobile Device

Manage hardware like iOS devices, Android Devices, Blackberry

Services

- HKBN JOS can help you ensure your long-term MDM success. Starting with setup and through configuration and installation – all controlled via SLA's tailored to fit your business.
- We also offer a comprehensive Client Enrolment service designed to get your staff on-board
- with MDM as quickly, smoothly and securely as possible.

Making waves on-the-move

Today's mobile devices have more computing horsepower than NASA did when they put men on the moon. Harnessing that power without compromising its potential takes special expertise.

You don't have to go it alone. HKBN JOS MDM service solutions can take the bumps out of the road, keeping your company safe and giving end-users a smooth and rewarding experience. Benefits include:

-  Remote access
-  Document control
-  Device security
-  Corporate compliance
-  Whitelist / blacklist (e.g. block Facebook)
-  Bulletproof BYOD
