

HKBN JOS CLOUD SOLUTION

What Stopping you from Trying Cloud?

Understanding of Cloud

- No official definition on cloud
- Have questions on cloud:
Why? How? What are the benefits? Is investment uncertain?

Security Concern

Have data breache concern if put sensitive data on cloud

Unexpected Outcome

- In doubt on outcome: Is cloud adoption by trial and error?
- Raise question again if error occur: Does cloud really help?

Existing Hardware Issue

- Dispose of existing hardware creates objection to cloud
- Hybrid cloud is complex if reuse existing hardware or want existing hardware co-exist with cloud

What does HKBN JOS do along your Cloud Journey?

By Plan & Design

Plan and design cloud architecture based on experiences and technical know-how

Cost-effectiveness

Identify specific elements should be on-premises or on-cloud

Neutral Assessment & Expected Outcome

Utilize a neutral model “Cloud Maturity Model” to

- Evaluate the necessity of cloud adoption
- Build a custom roadmap towards establishing the best-suit cloud solution

Security Measures

HKBN JOS cyber security team helps to identify, protect, detect, respond and recover cloud security threats

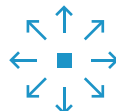

Cloud Maturity Stage	Task	Outcomes
 Planning Stage	Confirm business strategy and operating model	Identify what can and cannot be migrated and align with the business requirements for elastic workload provisioning
 Private Cloud	Define parameters and metrics to apply technology alternatives while DO or DO NOT! There is no try	Identify the appropriate methods to move forward to a scalable, easy to provision and de-provision stage of workloads
 Hybrid Cloud	Map the services to be used in terms of scalability. Emerge technologies and skills to be available within a given set of time frames	Identify the right technology to be used in order to transform from CapEx to OpEx and pick up the skills to handle the evolution
 Public Cloud	Associate the security and compliance requirements with available Public Cloud providers and make adequate use of cloud computing	Identify the possible solutions that can meet the requirements of security and compliance making the transition from Hybrid Cloud to Public Cloud is stable and safe

What are the Advantages for Cloud Adoption?

Low operating expenses

Reduce expense on physical maintenance of hardware, and upgrade of software and hardware

High flexibility

Add or remove scalable services on demand to fit changing needs

Easy control

Provision huge amounts of computing resources in minutes easily, mitigate capacity planning issues
