

# HKBN JOS Success Story

## PIZZA HUT HONG KONG

**Solution:** WhereScape & Tableau

**Industry:** Food and beverage

### Pizza Hut Hong Kong enjoys crisp data insights with new data warehousing and visualisation tools

Pizza Hut Hong Kong deployed a proof of concept integrating WhereScape and Tableau to test out next-generation database management and presentation capabilities. The former completely remedied the documentation issues that Pizza Hut had faced in the past, while greatly enhancing its ability to quickly derive actionable insights from disparate data sources. Meanwhile, the latter provided a set of intelligent templates for Pizza Hut to visualise data in a meaningful and appealing way.

### Challenges

Unable to scale up to meet demand

Inefficient data presentation tools that gleaned little insights from data

Data scrubbing hindered time-to-insight

Inconsistent data warehouse operations across teams

“HKBN JOS has shown initiative and is driven to solve our problems.”  
– Ravel Lai, Regional IT & Digital Director, Jardine Restaurant Group.

### Benefits

WhereScape:  
built-in documentation

WhereScape:  
scalability for future

Tableau:  
speedy reports

Tableau:  
impressive data  
visualisation
